Region 7 ER Report: February 16, 2021

R7 State EOCs:

State	Ops at EOC	Phone Duty Officer Ops
Kansas	State EOC is still operational. ESF 10 is still activated and participating remotely for all briefings. All staff have returned to work and are working remotely as much as possible; with a limited number of staff in the office. KDHE has resumed site-work and limited staff travel to areas not identified as COVID-19 hotspots.	PDO (spills coordinator) is in the office and taking spill line calls through routine methods. After-hours PDO is staffed by the Spill Coordinator and assisted by other staff. District offices are working spills through routine methods.
Nebraska	NDEE is in normal work status. Offices are open to the public and will remain open. NDEE has completed the move of its new Lincoln office. The office is fully open. Most NDEE employees are working their normal hours at their office workstations (COVID-19 specific remote-work policies will continue to be implemented).	The main number for NDEE (402-471-2186) will still be answered (8-5 Monday through Friday) and transferred as before. NDEE Emergency Response Program Activities will not be affected. However, individual phone numbers will most likely go to voice mail and then forward to e-mail; callers are encouraged to leave messages
Iowa	State EOC is open virtually with only EM staff regularly on-site. Briefings are no longer being held unless necessary. EOC taskings are being conducted virtually through WebEOC.	Spill line is being answered as normal. The Iowa DNR is in Phase 1 of Return to Work Plan (<25% in office), other staff remain AWL. Need for response evaluated at time of call as normal.
Missouri	State EOC currently open. ESF 3 and 10 not currently staffed but maintaining awareness of ongoing operations.	PDO taking spill line calls from alternate work location(s). Will have delayed response times due to teleworking of all responders.

Significant Events:

EPA OSC Ferguson responded to a release from an ethanol plant in Mead, NE. The release traveled about 4 miles off-site and has been contained and awaits better weather later this week to begin cleanup by the ethanol facility.

R7 Responders and Phone Duty Personnel for the Week:

R1 – Jeff Pritchard

R2 – Joe Davis

Day Phone – Doug Ferguson

Weekend Phone – Yvonne Smith

REOC Status: Level 2, Type 4: Virtual and partial REOC activation to support regional COVID-19 related activities

Weather Outlook:

Extreme cold temperatures expected throughout the region. For the Kansas City area forecast, go to:
